

Cisco Certified Network Professional (CCNP Routing & Switching)

Program Summary

This instructor-led program with a combination of lecture and hands-on laboratory exercises is designed to build advanced or journeyman knowledge of both LAN and WAN infrastructure implementations in a Cisco environment. This set of courses builds on the concepts introduced in the CCNA program. Students will be exposed to more in-depth concepts relating to routing implementation and design; TCP/IP design strategies; switching concepts; WAN optimization and performance issues; as well as, basic troubleshooting/support techniques and approaches. Some of the many protocols that will be studied include: TCP/IP, RIP, EIGRP, OSPF, IS-IS, BGP. Other topics include: VLAN implementation and management; spanning-tree protocol; multicast management; remote access implementation; Cisco security features including AAA; subnet concepts, design considerations, and implementation; VLSM; CIDR and more. These are advanced courses providing the skills and knowledge necessary to pass the Cisco certification exams (three exams) necessary to become a Cisco Certified Network Professional (CCNP).

- Certification program
- 192 Contact Hours, 12 Credit Hours, 24 Weeks

TERM 1

Course No.	Course Name	Quarter Credit Hours	Clock Hours
CCP100	Professional I	3	48
CCP110	Professional II	3	48
Total		6	96

TERM 2

Course No.	Course Name	Quarter Credit Hours	Clock Hours
CCP120	Professional III	6	96
Total		6	96

Prerequisites

Candidates wishing to enter this course should have completed the Cisco Certified Network Associate program or have commensurate experience WAN technologies in a Cisco environment.

Type of Document Received Upon Graduation

Upon successful completion of all program requirements, each student will be awarded a Certificate of Completion.

Certification Tests

All certification exams are scored on a pass/fail basis. Depending on the specific exam, a correct response to 75% - 80% of the questions will be required to achieve a passing score. Students are encouraged to take exams immediately following completion of the corresponding course.

Career Development

Students who successfully complete this program will be prepared for midlevel professional opportunities in the IT field with emphasis on design, installation, and configuration of Local Area Network (LAN) and Wide Area Network (WAN) infrastructure. Although titles may vary by hiring organizations, students with these credentials are qualified to meet the requirements of positions such as Sr. Network Engineer, Sr. Network Support Specialist, SR. WAN Engineer, Sr. LAN/WAN Engineer or similar designations.

This program also aligns with the following career opportunities classified by US Department of Labor under the Standard Occupational Classification (SOC) system.

- 15-1152 Computer Network Support Specialists
- 15-1143 Computer Network Architects
- 25-1021 Computer Science Teachers, Postsecondary

Recommended Next Course

Candidates wishing to further their education are recommended to consider the Cisco Certified Security Professional (CCNP Security) program as the next logical step towards becoming a well rounded IT professional.

CCNP Program Details

COURSE CCP100

Title: Implementing Cisco IP Routing (ROUT)

Exam: 300-101

Course Description

This instructor-led program with a combination of lecture and hands-on laboratory exercises will certify that the successful candidate has important knowledge and skills necessary to use advanced IP addressing and routing in implementing scalability for Cisco ISR routers connected to LANs and WANs. The exam covers topics on Advanced IP Addressing, Routing Principles, Multicast Routing, IPv6, Manipulating Routing Updates, Configuring basic BGP, Configuring EIGRP, OSPF, and IS-IS.

Course Objectives

This course will cover the following subjects:

- Identify Cisco Express Forwarding Concepts
- Explain General Network Challenges
- Describe IP Operations
- Explain TCP Operations
- Describe UDP Operations
- Recognize Proposed Changes to the Network
- Configure and Verify PPP
- Explain Frame Relay
- Identify, Configure, and Verify IPv4 addressing and subnetting
- Identify IPv6 Addressing and Subnetting
- Configure and Verify Static Routing
- Configure and Verify Default Routing
- Evaluate Routing Protocol Types
- Configure and Verify GRE
- Describe DMVPN
- Describe Easy Virtual Networking
- Describe IOS AAA Using Local Database
- Describe Device Security Using IOS AAA with TACACS+ and RADIUS
- Configure and Verify Device Access Control
- Configure and Verify Router Security Features
- Configure and Verify Device Management
- Configure and Verify SNMP
- Configure and Verify Logging
- Configure and Verify Network Time Protocol
- Configure and Verify IPv4 and IPv6 DHCP
- Configure and Verify IPv4 Network Address Translation
- Describe IPv6 NAT
- Describe SLA Architecture
- Configure and Verify IP SLA
- Configure and Verify Tracking Objects
- Configure and Verify Cisco NetFlow

COURSE CCP110

Title: Implementing Cisco Switched Network (SWITCH)

Exam: 300-115

Course Description

This instructor-led program with a combination of lecture and hands-on laboratory exercises will certify that the successful candidate has important knowledge and skills necessary to implement scalable multilayer switched networks. The exam includes topics on Campus Networks, describing and implementing advanced Spanning Tree concepts, VLANs and Inter-VLAN routing, High Availability, Wireless Client Access, Access Layer Voice concepts, and minimizing service Loss and Data Theft in a Campus Network.

Course Objectives

This course will cover the following subjects:

- Configure and Verify Switch Administration
- Configure and Verify Layer 2 Protocols
- Configure and Verify VLANs
- Configure and Verify Trunking
- Configure and Verify EtherChannels
- Configure and Verify Spanning Tree
- Configure and Verify Other LAN Switching Technologies
- Describe Chassis Virtualization and Aggregation Technologies
- Configure and Verify Switch Security Features
- Describe Device Security Using Cisco IOS AA with TACACS+ and RADIUS
- Configure and Verify First-Hop Redundancy Protocols

COURSE CCP120

Title: Troubleshooting and Maintaining Cisco IP Networks (TSHOOT)

Exam: 300-135

Course Description

This instructor-led program with a combination of lecture and hands-on laboratory exercises will certify that the successful candidate has important knowledge and skills necessary to secure and expand the reach of an enterprise network to (1) plan and perform regular maintenance on complex enterprise routed and switched networks and (2) use technology-based practices and a systematic ITIL-compliant approach to perform network troubleshooting.

Course Objectives

This course will cover the following subjects:

- Use Cisco IOS Troubleshooting Tools
- Apply Troubleshooting methodologies
- Troubleshoot Switch Administration
- Troubleshoot Layer 2 Protocols
- Troubleshoot VLANs
- Troubleshoot Trunking
- Troubleshoot EtherChannels
- Troubleshoot Spanning Tree
- Troubleshoot other LAN Switching Technologies
- Troubleshoot Chassis Virtualization and Aggregation Technologies
- Troubleshoot IPv4 Addressing and Subnetting
- Troubleshoot IPv6 Addressing and Subnetting
- Troubleshoot Static Routing
- Troubleshoot Default Routing
- Troubleshoot Administrative Distance
- Troubleshoot GRE
- Troubleshoot IOS AAA using Local Database
- Troubleshoot Device Access Control
- Troubleshoot Router Security Features
- Troubleshoot Device Management
- Troubleshoot SNMP
- Troubleshoot Logging
- Troubleshoot Network Time Protocol
- Troubleshoot IPv4 and IPv6 DHCP
- Troubleshoot IPv4 Network Address Translation
- Troubleshoot SLA Architecture
- Troubleshoot Tracking Objects
